1 Introduction

1.1 This manual

This manual contains the instructions for repairs and general maintenance of the Sedeo seating system (Sedeo Lite/Pro/Pro+). Mechanics who do repairs on this seating system must be well trained and familiar with the repair methods and the maintenance of the seating system.
Always make sure that the work is carried out safely, particularly with respect to procedures requiring the seating system to be lifted up.
We advise that you contact our service department before doing repair work on a seating system that has been involved in an accident.
The following specifications are important when ordering parts:

- Model
- Year of manufacture
- Identification number
- Part number
- Name of the part concerned

This information is provided on the identification plate. See 'Identification of the product'.

Available documentation
The following technical documentation is available / required to service this seating system:

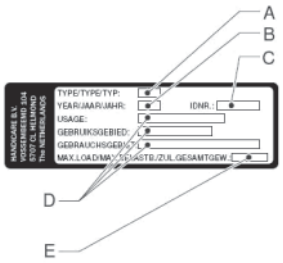
- User manual
- Service manual

Service and technical support
For information concerning specific settings, maintenance or repair works please contact your supplier. He is always prepared to help you.
Ensure you have at hand:

- Model
- Year of manufacture
- Identification number

This information is provided on the identification plate. See 'Identification of the product'.

1.2 Identification of the product



The identification plate contains the following data:

A. Model
B. Year of manufacture
C. Identification number
D. Use area indoors or outdoors
E. Maximum load in kg

1.3 Symbols used in this manual

Warning symbol

Follow the instructions next to this symbol closely.
Not paying careful attention to these instructions could result in physical injury or damage to the seating system or the environment.

Reference symbol

The symbol refers to a separate user manual. This reference will indicate the specific user manual and the section to which is being referred.

2 Safety

2.1 Personnel qualification

Service technicians:
Repairs may only be carried out by trained and authorised service technicians.
During the execution of their work, they are at all times fully responsible for the fulfilment of locally applicable safety guidelines and standards.
Temporary employees and persons in training may only carry out repair and replacement work under the supervision of an authorised service technician.

2.2 Cautions and warning statements

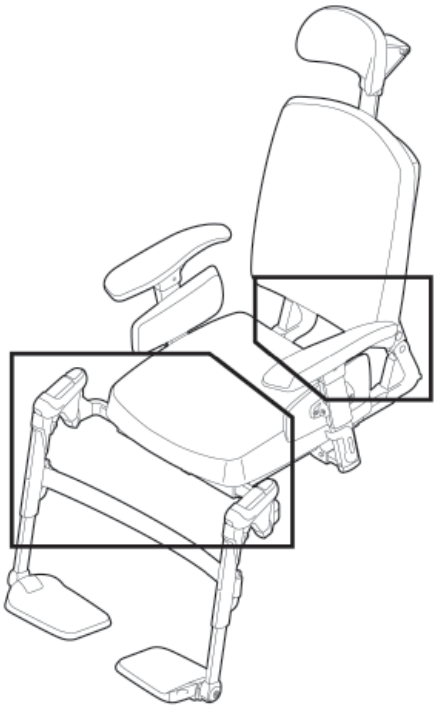
⚠ **Safety**
Safety information is indicated with the warning symbol.

- Follow the instructions carefully next to these warning symbols! Not paying careful attention to these instructions could result in physical injury or damage to the seating system or the environment. Where ever possible, safety information is provided in the relevant chapter.

⚠ **Temperature**

- Avoid physical contact with the seating system's motors at all times. Motors are continuously in motion during use and can reach high temperatures. After use, the motors will cool down slowly. Physical contact could cause burns.
- If you do not use the seating system, ensure that it is not exposed to direct sunlight for lengthy periods of time. Certain parts of the seating system, such as the seat, the back and the armrests can become hot if they have been exposed to full sunlight for too long. This may cause burns or allergic reactions to the skin.

⚠ **Moving parts**



- A seating system has moving and rotating parts. Contact with moving parts may result in serious physical injury or damage to the seating system. Contact with the moving parts of the seating system should be avoided.
- Electrical backrest adjustment
- Electrical elevating legrests

⚠ **Decals and instructions on the seating system**
Decals and instructions on the seating system
- The signs, symbols and instructions affixed to the seating system comprise part of the safety facilities. They must never be covered or removed. They must remain present and clearly legible throughout the entire lifespan of the seating system.
- Replace or repair all illegible or damaged signs, symbols and instructions immediately. Please contact your supplier for assistance.

2.3 Used decals on the seating system

Check manual before using

The seating system must not be lifted up by the armrest assembly, complete and/or legrests.

The stability of the seating system is influenced by the adjustment of the seating system’s centre of gravity. Such adjustments should be made by professionals only.

3 Tools, parts and components

3.1 Tools

The tools below are needed for various mechanical settings and maintenance:

Quantity	Description	Size (mm)
1	Screwdriver, medium	-
1	Screwdriver, crosshead	-
1	Hammer (plastic)	-
1	Chaser	-
2	Open ended spanner	17
2	Ring spanner	13
1	Torx key	T25, T30
1	Loctite 243	-
#	Tie wraps	
Remark Size: the EU key width (of the relevant tool).		

⚠ Use only high-quality tools for the adjustment(s) described.
Make sure that the hexagon of the spanner is attached securely to the hexagon of the fastening article. This prevents the 'rotation' of hexagons of fastening articles and spanners that may affect proper adjustment.

4 Spare parts

4.1 Use of the parts lists

This document is meant as a reference book to be used to order parts for the seating systems that are shown on the front cover.

How to order:
When ordering parts, please specify:
- Serial number (see the identification plate)
- Group (to which the relevant part belongs)
- Article number
- Number of parts required
- Description (in the relevant language)
- Dimensions (if applicable)

Remark:
- If a part does not have a position number, it means that the part concerned cannot be purchased separately. The part concerned is part of the assembly shown. This assembly must be ordered as one piece. It has to be replaced in its entirety.
- Boxed position numbers refer to the relevant drawing.

Order address:
Please mail or fax your orders to your supplier.

Service technicians:
Repairs may only be carried out by trained and authorised service technicians.
During the execution of their work they are at all times fully responsible for the fulfilment of locally applicable safety guidelines and standards.
Temporary employees and persons in training may only carry out repair and replacement work under the supervision of an authorised service technician.

5.4.11 Sedeo Pro+ / Mounting the standard or swing-away controller bracket

Preparation
Note! Switch off the wheelchair via remote control.

Instructions
Note! Suitable work area required!
- Follow the illustrated instructions for mounting the standard or the swing-away controller bracket.
- **Note!** Check the cable laying after you have mounted the swing-away controller bracket, connected the controller and adjusted the height, width and depth of the armrest. The controller cable needs enough clearance to swing away the controller freely inwards and outwards.
